

Danube Ports Day 2020

Integrated sustainable logistics solutions for Danube Region ports

Final Agenda

Date & time: 17 November 2020 / 10:00 – 14:30 (CET)

Location: online (Webex) based on prior registration

Registration link: https://ec.europa.eu/eusurvey/runner/Dionysus_DPD2020_Registration

Rolled out in the framework of the DIONYSUS project, the Danube Ports Day annual events are meant **(i)** to continue the well-established practice in the DAPHNE project by holding events dedicated to port affairs providing insights into the policy framework and concrete examples of development works and projects as well as **(ii)** to trigger future key actions meant to place Danube Region ports as ideal locations for setting up businesses relying on waterborne infrastructure.

This 2020 event shall facilitate a structured discussion on port development opportunities touching on topics such as **(a) shore side electricity** and **(b) integrated logistics**. Shore-side electricity, which allows ships to turn off their engines and plug into an electrical grid while at berth, has been steadily growing in popularity as a reliable solution to cutting emissions as well as reducing noise and vibration. First-hand information will be provided based on the results of several EU & national funded projects, whereas, at the same time, two fleet operators will present from a user's perspective related prerequisites. In relation to the second topic, two **port operators from Romania and Moldova** will introduce their logistics solutions to efficiently accommodate intermodal transport to and from their ports, whereas one **logistics service provider from Hungary** will offer examples of fully integrated logistics solutions making use of the waterways.
